

Floor mounted lift masts, lifting and supporting a 50' long work platform. Unit is pictured in our shop so it does not show how it is anchored to floor and attached to wall of booth at top of unit. This type of lift system can be configured to accommodate various lengths and widths of platforms. If needed individual roll out sections can be incorporated into the main deck to accommodate varying widths of products. Platforms can be used in hazardous, wet or even blast media locations. Power units can be located on exterior of booth and can be either air/hydraulic or electric/hydraulic.
