

## ***Rail-Guided Overhead Platform Paint or Blast Environments***

Fixed height platforms are powered by a pneumatic drive system and are suitable for sanding, prep, painting and blast applications.

Platform runs on an overhead guide rail system with variable travel speeds up to 60fpm.

72" x 36" platform allows for multiple workers, supplies and equipment like paint pots in the platform. Size of platform and customized features can be designed to fit your application.

Auxiliary air connection in platform supports paint pot or auxiliary equipment.

Custom designs and configurations available.

## Typical Applications:

Paint / Powder Coating Applications  
Blast Booth / Room (Strip & Prep)  
Welding / Fabrication  
Assembly  
Wash / Rinse (Prep)  
Fall Protection / Safety / Ergonomics  
Maintenance / Inspection  
Material Handling / Loading Bays  
Clean Room

## Common Industries Served:

Aircraft & Aerospace  
Agricultural & Construction Equipment  
Electrical Power & Distribution  
Light Rail & Bus Manufacturing / Maintenance  
Military Equipment  
Rail Car & Locomotive Manufacturing / Maintenance  
Rail Systems  
Transit Authorities  
Trucks & Recreational Vehicles

# Commitment to Quality & Worker Safety

LPI is recognized as an innovative partner to companies and customers who need to elevate their workers to the task at hand. We design and fabricate personnel lifts and platform systems to serve industries and customers worldwide. Application specific lift systems enable our customers to comply with regulations and standards for worker safety.

With over 100 years of combined experience, our sales and engineering team will manage your project through the design and fabrication process to provide you with a cost effective lifting solution.
